PROFESSIONAL SUMMARY

Electrical and Electronic Engineering student specializing in Software Engineering. Gained practical and hands-on experience in the telecommunications sector focusing on deploying network infrastructure and installation Internet connectivity for rural communities. Strong foundation in electrical and electronics principles, strong background in hardware-software integration, embedded systems and software development. Fluent in Malay with intermediate English communication skills, eager to apply technical adaptability to real-world software engineering roles.

EDUCATION

International Islamic University Malaysia (IIUM), GombakOctober 2022 - December2026

Bachelor of Electrical and Electronic Engineering

- Specialized in Software Engineering
- CGPA: 3.71

Centre for Foundation Studies IIUM (CFS IIUM), GambangAugust 2021 - August 2022

Foundation in Engineering and Computer Science

- CGPA: 3.89
- English Placement Test (EPT): Band 7

WORK EXPERIENCE

Engineering Industrial Training (EIT)July 2025 - September 2025

Steadcom Sdn. Bhd., Puchong, Selangor

- Supervised sub-contractors and machinery operators during pole installation and HDD operations for fiber optic deployments.
- Conducted daily on-site work inspections and quality checks.
- Coordinated supply chain logistics, including inventory tracking and pole delivery scheduling.
- Performed precision fiber optic splicing on 48-core cables.
- Liaised with JKR and KUDR during joint site walks for regulatory compliance.
- Participated in coordination meetings with project managers to align D-side/E-side scopes and schedules.

PROJECT

Final Year Project (FYP)

Personal Protective Equipment (PPE) Detection using Computer Vision for Workplace Safety

- Developed an automated and real-time monitoring system that simultaneously detects workplace compliance for multiple Personal Protective Equipment (PPE) items in head region
- Combined Swin-L backbone with a custom CDDR neck and YOLOv8 head to boost small-object detection accuracy.
- Achieved exceed 90% precision at 11–13 FPS monitoring speed.

Integrated Design Project (IDP) and Technology Entrepreneurship

Smart Temperature Monitoring System for Cat

- Led a 5-member team building an IoT temperature monitoring system for early cat health detection.
- Developed an ESP32-based system streaming sensor data to the Blynk app every 2 minutes.
- Automated weekly average temperature calculations with graphical display in-app.

SKILLS

Software: MATLAB (Basic), Arduino IDE (Basic), Google Colab (Intermediate), Cisco Packet Tracer (Basic), Wireshark (Basic), VScode (Basic).

Programming: C++ (Intermediate), C (Intermediate), Java (Basic), Python (Basic).

General Software: Microsoft Excel (Basic), Microsoft Word (Intermediate), Microsoft Powerpoint (Basic), Canva (Advanced)

Languages: Malay (Advanced), English (Intermediate)

EXTRACURRICULAR ACTIVITIES

Community Service Program Manager

- Conducted a Muslim Youth Leadership Mentoring program around 80 students from SMK Lembah Keramat (Forms 1 to 5), driving initiatives centered on personal development and team leadership.
- Organized structured team activities aimed at improving students' interpersonal skills, problem-solving abilities and long-term career readiness.

Committee

- Held 5 leadership/media roles across Andeka Caklempong Club events (2023–2025) including Head of Media and Program Manager.
- Served on the organizing committee for Engineering Premier League 2025 (Enginius Sports and Recreation).
